TURN TABLE

Turn the world with ISB

We are a leading manufacturer of turntables, with extensive experience and state of the art production facilities. We offer a wide range of standard turntables and custom made design to meet your high standards and needs. Our turntables are used in various applications, such as parking lots, factory automation, amusement parks, museums, and shop displays.

IGUCHI KIKO CO.,LTD.

ISB TURNTABLE

Smooth Rotation and Smart Operation

The origin of the ISB Turntable dates back to the rotating mechanism of the gun turrets on the legendary Battleship Yamato. The ISB technology has evolved and developed over the years, and is presently embodied in Turntables used at amusement parks, motor show displays, glamorous fashion shows, glittering Christmas trees, and many other applications that use "Rotation" to make life more fulfilling. Moreover, the ISB Turntables are the No.1 choice for parking lots in malls and apartments.

The ISB commitment to quality and excellence pioneered new technology for cleanrooms in the production of semiconductors and FPDs. The ISB Turntables are also designed and manufactured with the same commitment; smooth rotation, precision in speed and control, high integrity, strong and durable. Our technology and flexibility in design has been manifested in the production of ISB custom made Turntables for the automobile industry and factory automation applications of various industries.

The ISB Turntable is buttressed by our long years of experience and unequivocal technology, and has been designed for efficient installation. The use of ISB Turntables is expanding; from professional business use to private garages.

ISB TURNTABLE

Precise and Smooth Rotation, achieved by high-quality standards of ISB.

All major parts used in the ISB Turntables have been designed and manufactured by ISB; for example the SW Guide Wheels and the Central Shaft.

The SW Guide Wheels and the Central Shaft are key components of the ISB Turntable, supporting smooth rotation, and enhancing endurance and accuracy. The SW Guide Wheels have been specially developed and designed for use in turntables, and we offer a broad line-up for varied applications. At ISB we design, manufacture, and install the turntables - we are your one-stop solution for turntables.

(For more information regarding the SW Guide Wheels, please refer to the section on SW Guide Wheels.)

Turntables for Parking Lots

The No.1 Japanese Turntable manufacturer

More than half of the Turntables installed annually in Japan are ISB Turntables. ISB Turntables are renowned for its technological capabilities, robust structure, and trustworthiness.

Special Features

Installation:

The ISB Turntables only requires a flat pit and are designed for easy installation, drastically reducing manpower hours.

Trustworthiness:

We have installed more than 5,000 Turntables and also received Governmental Certification as manufacturer of Turntables.

5th step Place concrete around corner frame.

※This step is not included in our service. The construction company has to fill in the concrete.

Installation Process for installation

1st step

Measure and mark the planned center of the Turntables.

2nd step

- Set and position support base.
- Adjust the level of SW Type Special Wheel and Center axis

3rd step

- Set top of table
- Adjust the drive unit position

4th step

Set corner framework

Standard Turntables for Parking Lots

Type	Turntable diameter (mm)	Movable load (kg)	Standard Product dimensions H (mm)	Rotation speed (r.p.m)	Motor(kw)	Power source
ISB-40	4000	2500	450	1	0.75	3P/AC200V Option: 2P/AC100V 2P/AC200V
ISB-45	4500	2500	500			
ISB-55	5500	8500	550		1.5 × 2	3P/AC200V

Turntable Mechanism

Support Base

This base consists of a mechanism to adjust the Turntable level.

SW Guide Wheels and Central Shaft

These have been specially designed and manufactured by ISB to support rotation.

Drive Unit

The Drive Unit uses friction drive transmission to rotate the Turntable, using a urethane roller for Noise reduction.

Table Top

The table top has been specially designed and prepared for accurate installation.

Exterior Frame

The exterior frame helps retain the shape and clearance gap for smooth rotation of the Turntable.

Control panel

The Control Panel consists of push-buttons to operate the Turntable. The Power Inverter Mechanism ensures smooth starts and stops. The Control Panel can be installed by suspending on a wall or on a stand.

Options

Guide Ring

The Guide Rings are markers for the automobile wheels, to ensure safe rotation.

Galvanization

The Table Top can be galvanized for rust prevention.

Complete Galvanization

All parts can be galvanized for weathered environments.

Noise Reduction

A flange rail mechanism and MC Nylon Caps for the SW Wheels are available for noise reduction.

Custom Table Top Finish

Table tops to accommodate custom finish, such as brick, concrete, stone, grass, etc.

※The custom layer(finish) will be a responsibility of the construction company. It is not included in our service.

Remote Control

Option to remotely operate the Turntable.

Standard color: Gray (RAL 000 55 00)

Low-Profile Turntable

The Low-Profile Turntable does not require a pit for installation, and therefore can be installed on a flat, concrete surface. Nylon rollers are used as support rollers enhancing quiet and smooth rotation.

Standard color: Gray(RAL 000 55 00)

Turntable specification

Type	Turntable diameter (mm) A	Movable load (kg)	Motor(kw)	Length of Slope (mm) D	Height (mm) B	Height of Drive Unit (mm) E	Rotation speed (r.p.m)	Power source
ISB-25L	2500	500	0.1	310	85	90mm from surface of Turntable	1	3P/AC200V Option: 2P/AC200V
ISB-40L	4000	2500	0.4					
ISB-45L	4500			330	90	85mm from surface of Turntable		

Turntable Mechanism

※Picture is ISB-40L (custom color)

Drive unit

The component is very simple and compact.

An urethane roller is used for rotation and enhances noiseless movement.

※Customization to Stainless Steel is available upon request.

Control panel

There are 2 buttons, right and left, on the panel. Press the button to activate and Release the button to stop.

Turntable keeps rotating until the button is released.

Example of turntables

Customized Turn Table

Customized turntables are used in various factory automation applications. We provide the best service, design, manufacturing, and installation. Therefore, we are the trusted supplier of customized turntables for various companies around the world.

Please contact us with any requirements for customized turntables. We have extensive experience designing, manufacturing, and installing turntables capable of handling extreme loads.

Compact Turn Table

► Turntables can be used in assembly and production lines.

Can change size of turntable by installing larger table top.

► Turntables can be used in automated filling lines.

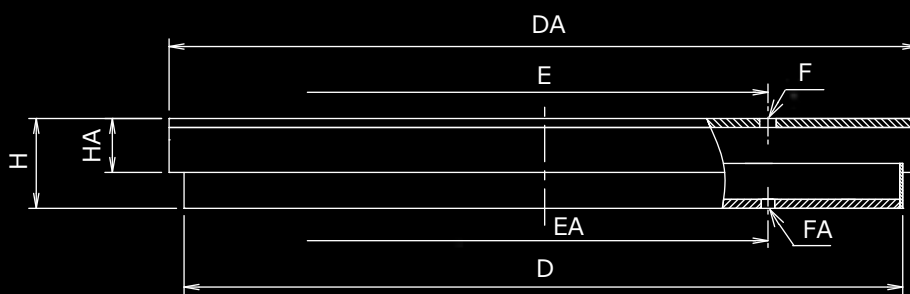

Turntables can be used as worktables, by installing a bottom frame.

► Manual Turntables can be used to assemble small units.
